

Matteo Moi - Software Engineer

Location: Sondrio, Italy | Email: dev@jok98.com
 LinkedIn | GitHub | Personal Website

PROFESSIONAL SUMMARY

Software Engineer focused on Java, Spring Boot, backend services, API contracts, integrations, and DevOps-aware delivery across fintech, banking, and insurance domains. Work spans service refactoring, client customizations, authentication, batch processing, data-adapter integration, OpenAPI boundaries, and CI/runtime diagnostics.

EDUCATION

BSc Computer Science - eCampus University, in progress | IT Diploma

TECHNICAL SKILLS

- Backend:** Java 8/17/21, Spring Boot, REST APIs, OpenAPI, Maven, MapStruct, JPA/Hibernate, Flyway, JUnit, Mockito, Testcontainers.

Data & Integration: Data adapters, DTO/domain conversion, PostgreSQL, Oracle, MySQL, MongoDB, JasperReports/JasperSoft, XML payloads.

Tooling: GitHub Actions, GitLab CI, Prometheus, Grafana, Loki, OpenTelemetry, Linux, Arch, Hyprland/Omarchy, JavaFX, jlink, jpackage, shell scripting.
- IAM & Security:** Keycloak, OAuth2/OIDC, JWT, Spring Security, authentication, authorization.

Architecture/Ops: Microservices, DDD, event-driven design, Kafka, RabbitMQ, OpenFeign, Resilience4j, Docker, Kubernetes, Helm, Argo CD, GitOps, Istio.

PROFESSIONAL EXPERIENCE

- Kirey**

Software Engineer **HR / TIME & ATTENDANCE** August 2026 - Present

 - Support Stellantis customizations on ADP's HR and Time & Attendance platform as a Kirey consultant, using legacy Java 8 and proprietary frameworks.
- Objectway**

Software Engineer **FINTECH** January 2024 - August 2026

 - Worked on Advice, Objectway's portfolio-management and advisory platform, contributing to backend services, API/data flows, authentication, batch processing, reporting features, and integrations.
 - IAM (Allianz): Managed the project's IAM architecture and environment, directly configuring Keycloak and integrating authentication and authorization into Spring Boot applications using OAuth2/OIDC, JWT, and Spring Security.
 - Refactored and migrated backend generation workflows for multiple business variants, covering request mapping, data loading, domain conversion, composition, and payload preparation.
 - Integrated service/data-adapter layers while preserving clean Params/domain/OpenAPI ownership and avoiding generated DTO leakage into domain code.
 - Delivered client customizations for Credit Suisse, Allianz Bank, Mediobanca, and TNB, including Spring Batch migration activities, reporting changes, and CI/runtime diagnostics.
- Iriscube Reply (SistemItaly)**

Software Engineer **BANKING** August 2023 - January 2024

 - Delivered banking dashboard and back-office functionality for Credit Agricole, covering backend services, OpenAPI contracts, persistence, and frontend integration support.
 - Implemented RESTful services with Spring Boot, JPA/Hibernate, PostgreSQL, JUnit 5, and Mockito, keeping API signatures, versioning, and compatibility aligned with frontend needs.
- Blue Reply (SistemItaly)**

Junior Software Engineer **INSURANCE** April 2022 - August 2023

 - Implemented Business Requirements, Change Requests, hotfixes, REST APIs, frontend features, and environment/release activities with production-readiness attention.
 - Managed test/production environment activities and contributed to the migration from Vaadin 8 to Vaadin 24.

LANGUAGES

Italian: Native | English: Technical working proficiency | Japanese: Basic

INTERNATIONAL EXPERIENCE

Japan: studied Japanese language and culture in Sapporo, Fukuoka, and Kobe, strengthening adaptability and cross-cultural communication.
